RADAR
BY BTB SECURITY

BTB Security's Rapid Advanced Detection And Response (RADAR), is a modern approach to threat detection and response. Pushing past MDR to XDR, RADAR offers multi-signal cloud-delivered services to transform your defense from reactive to proactive.

THE RADAR DIFFERENCE

VISIBILITY

Multi-signal ingestion, layered visibility into activity, focused correlation, zero trust

DETECTION

Analytics and automation, multi-source intelligence, elite Threat Hunters

RESPONSE

Business-focused operational analysis, remote containment focused intelligent response

MEET RADAR

RADAR provides an adaptable advantage in a cloud native platform. Purpose built by hackers, our threat operations team hunts and contains attacks that traditional defenses miss.

RESULTS

- No BS (Blind spots)™ approach – complete visibility and multi-signal ingestion

- Contextual advanced analysis and automation to triage anomalies, find stealthy and sophisticated threats, and suppress false positives

- Prevents cyberattacks and strengthens overall security processes

- Focuses on strategic security and business initiatives

THE BTB DIFFERENCE

We're the only **pragmatic security company** in the market. All delivery, no hype.

We **embrace, rather than ignore,** existing investments, practices, and data—extracting and building upon valuable insights.

We have a **vendor-agnostic approach,** and we're not here to sell you products or software that you don't need.

Honesty in delivery – it may not be what you want to hear, **but it's what you need to hear.**

BTB: STRUCTURED FOR YOUR SECURITY NEEDS

PROFESSIONAL SERVICES

Incident response, penetration testing, vulnerability assessment, governance, compliance, CISO Advisory and other consulting services

RADAR

Advanced detection and automated response platform

RIOT LABS

Reverse engineering, offensive tactics lab and industry intelligence

1 We have a singular focus: Cybersecurity

250 Satisfied clients

97% Customer retention

BTB SECURITY
